

To the Honourable the Speaker and Members of the House of Representatives

This petition of concerned Australians draws to the attention of the House that Australians want action to reduce carbon pollution.

Climate change is one of the most pressing economic, social and environmental challenges we face, and Australians will be hit hard if we do not respond with urgent and decisive action to reduce carbon pollution, improve energy efficiency and support the transition to a low pollution economy.

We therefore call on the House to pass legislation as quickly as possible that will put a price on pollution, create the necessary policy settings to take advantage of the economic opportunities presented by a low carbon future and ensure that Australian workers and their families are compensated for the cost of taking action on climate change.
